

# EDRIC MARTINEZ

FULL-STACK DEVELOPER

## ABOUT ME

My name is Edric Martinez and I am a 29 year old Full-Stack Developer. I enjoy writing clean code and finding solutions for any challenge. I'm a fast learner with a love for learning new software and languages.

## EDUCATION

### CODEUP

#### COMPLETION OF 4-MONTH FULL-STACK PROGRAM

Completed 16-week immersive program in full stack technologies, spent 480+ hours learning curriculum and building real work projects.

### UNIVERSITY OF TEXAS AT SAN ANTONIO

#### BACHELOR'S DEGREE IN BIOLOGY 2011

I have taken a diverse number of classes with a main focus on Neurology. I have also taken additional upper level maths such as Engineering Physics, Calculus II and Linear Algebra.

## PROJECTS

### EBTRACKER.COM

This a CRUD web application for inventory and shipment. Distributors can create new shipments and add product into these orders. They then receive a QR code for shipping and receiving. When scanned in it was input the products in their inventory. Once the products unique product code is scanned it will remove it from the inventory and mark as used. This is done by Utilizing PHP, Laravel, Html, Css, Javascript, and MySQL.

### ADLISTER

A Full-stack PHP Craigslist clone built using no framework. Classes were built to allow users authentication and post/manage ads created.

### WHACK-A-MOLE

A classic Whack-a-Mole game that uses front-end DOM manipulation by utilizing jQuery and Javascript.
